

ATTENTION MEMBERS: NEW EHC FORM NOW FUNCTIONAL

The Environmental Handling Charge (EHC) Input Website you use to remit your EHC revenues as a Member of the Western Used Oil Management Associations has been updated effective Wednesday, April 6th, 2016. While there is a new look, the website address remains the same (EHCFORM.COM), as well **your Usernames and Passwords remain the same**. The website functionality remains familiar but better.

When it's time to remit, continue to log in to the particular western Canadian association with whom you are dealing. Use your current Usernames and Passwords. Fill in the form and remit as you have always done.

Société de gestion des huiles usagées (SOGHU) (Quebec, New Brunswick and PEI) continue to have their own separate EHC remittance website.

If you encounter any issues with the new website/forms, please send details to Jason Culver, Controller, A/BCUOMA, jculver@usedoilrecycling.ca. Jason and his team will endeavour to clear up the issue promptly.

Background on EHCFORM.COM:

Members use the Form to electronically remit, on a regular basis to a particular provincial association, the EHC revenues collected in that province on the sale of lubricating oil, filters, antifreeze and plastic oil/antifreeze/ Diesel Exhaust Fluid (DEF) containers. Our members include first seller/importer/brand owners as well as Original Equipment Manufacturers (OEM).

The previous form, used by the British Columbia, Alberta, Saskatchewan and Manitoba Associations was built in Drupal 6 EOL. This particular program will cease to be supported this year by its developer. So this necessitated updating the EHC Form to a new platform. The upgrade work took place during the first quarter of 2016. What you see now is the results of three months of development and testing.

Thank you.
